

Dough Moulder Machine

Dough Moulder shapes and molds the dough for baking Flat (Thin) Breads, Baguette and small Baguette. This Machine is provided with four rolls with adjustable distance from 2 mm to 25 mm. The rollers are equipped with the convex nonstick plates that can be fixed to the frame.

This Machine is also equipped with adjustable panels for dough thickness that can be removed for cleaning purposes easily.

The maximum length of the Moulder Machine is 420 mm and output capacity per hour is 2,500 of the shaped dough. Weight of this Machine is 210 kg that can be moved and transferred by means of the wheels.

Technical Data

Cutting Capacity / 8 Hours(kg)	2500
Dough Cutting Weight (Gr)	50-1000
Dimensions of Machine (cm)	65x196x120
Electrical Power (Kw)	0.55 - 0.75
Machine of Weight (Kg)	210

Dough Rolling Machine

Rolling Machine is useful and practical Machine for dough forming for Baguette, Sandwich, Barbari Breads. In Industrial Bakeries, Rolling Machine is placed after Dough Rounder and dough is transferred by means of Conveyor Belt to the Rolling Machine.

Technical Data

Cutting Capacity / 8 Hours(kg)	1000
Electrical Power (Kw)	1.1
Dimensions of Machine (cm)	160x77x108
Voltage (V)	380
Machine of Weight (Kg)	210
