

Bread Slicing Machine is specialized in slicing of the breads equally. Different models of the blades are available for different bread types and slice thicknesses. The blades are complete stainless steel and appropriate for health. The Slicing Machine stops automatically after slicing process for high safety.

This Machine can be moved and transferred by means of the rotating wheels; easy to clean and works silent.

Can be provided as two models: Single Phase (220 V) and Three Phase (380 V) as per the request.

<i>Technical Data</i>	
Capacity (Piece / Hour)	500
Thickness of Cutting (mm)	10 - 13 - 15
Maximum of Bread Length (mm)	450
Number of Blades	24-30
Dimensions (cm)	72x80x110
Electrical Power (Kw)	0.37
Weight (kg)	140
